AVULA TARUN TEJ

WEB DEVELOPER | AI CODE EVALUATOR | AI/ML ENTHUSIAST

avulataruntej123@gmail.com | +91 9346453730 | Tadepalligudem, Andhra Pradesh, India
github.com/TARUNTEjjjj | tarun-tej.pages.dev | Open to remote coding projects
linkedin.com/in/a-tarun-tej-237420258

Developer building interactive web applications, reproducible machine-learning experiments and C++ tools. Learning web development since 2022 and using Python since 2023, with hands-on AI response and code evaluation experience across multiple projects.

TECHNICAL SKILLS

Web: JavaScript, TypeScript, HTML, CSS, React; responsive interfaces and browser applications.

Python & ML: Python, NumPy; neural-network fundamentals and reproducible evaluation. Developing practical skills in pandas, PyTorch and scikit-learn.

Systems & tools: C/C++, C++20, Git, GitHub, automated testing, GitHub Actions, Cloudflare Pages.

EXPERIENCE

AI Response & Code Evaluation | Outlier and Mercor | May 2026 - present

- Evaluate AI-generated responses and code against project-specific rubrics covering correctness, reasoning, relevance, clarity and instruction-following.
- Compare outputs, identify issues and provide structured written feedback with rubric-based judgments.
- Completed **222 total logged hours on Outlier** as of November 2026.

SELECTED PROJECTS

StormSignal | React, TypeScript

Weather workspace with interactive graphics, official-warning source checks and saved offline briefings. Hardened provider deadlines, retries and caching; verified 308 automated tests and the production build.

Neural Math Lab | Python, NumPy, JavaScript

Implemented forward propagation, backpropagation, SGD and Adam in NumPy. Interactive reports compare a neural network with logistic regression using separate training, validation and test data.

PocketKV | C++20

Persistent key-value store with an append-only log, checksums, file locking and recovery tests. Includes reproducible benchmarks for overwrite history and warm reopening.

Forge Learning Academy | React, TypeScript, Vite

Interactive learning website with a 3D map, guided Python and Git exercises, project editors, downloadable work and browser-saved progress.

Additional work: Created independent SAT mathematics videos with step-by-step explanations and worked examples.

EDUCATION & TRAINING

Pre-University Course (PUC) | RGUKT Srikakulam | Completed July 2023
CGPA: 8.27/10; First Class with Distinction. Coursework: IT, HTML/CSS, programming and Python.

9th Summer School on Artificial Intelligence | IIIT Hyderabad | 6-11 July 2025
Certificate of participation; learning focused on computer vision and machine learning.
