Developer focused on creating inspectable GitHub projects with working implementations, tests, documentation and reproducible examples. Work spans TypeScript web applications, Python/NumPy machine learning and C++ systems, supported by rubric-based AI code evaluation experience.

PROJECT DEVELOPMENT SKILLS

Languages: Python, JavaScript, TypeScript, HTML/CSS, C/C++.
Frameworks & tools: React, NumPy, Git, GitHub Actions, automated tests and Cloudflare Pages.
Focus: Debugging, regression coverage, numerical verification, documentation and reproducible experiments.

SELECTED GITHUB PROJECTS

StormSignal | React, TypeScript

Built a weather workspace with official-warning checks and offline briefings. Added bounded provider deadlines, transient-error retries and cache timeouts. Verified 308 tests and a production build; the UI explicitly reports incomplete source coverage.

Neural Math Lab | Python, NumPy, JavaScript

Implemented a neural network and optimizers directly in NumPy, with finite-difference gradient checks, training-only preprocessing and held-out evaluation. Exported self-contained browser reports with checkpoint replay and baseline comparisons.

PocketKV | C++20

Implemented a persistent key-value store with an append-only log, checksums and locking. Added recovery tests and reproducible benchmarks that separate overwrite-history cost from warm reopening.

AxiomMath | C++20, Python verification

Built exact rational arithmetic and expression parsing with checked overflow. Documented the mathematics and used Python fractions.Fraction as an independent differential reference.

EXPERIENCE

AI Response & Code Evaluation | Outlier and Mercor | May 2026 - present

- Evaluate AI-generated responses and code against project-specific rubrics covering correctness, reasoning, relevance, clarity and instruction-following.
- Compare outputs, identify issues and provide structured written feedback with rubric-based judgments.
- Completed **222 total logged hours on Outlier** as of November 2026.

EDUCATION & TRAINING

Pre-University Course (PUC) | RGUKT Srikakulam | Completed July 2023
CGPA: 8.27/10; First Class with Distinction. Coursework: IT, HTML/CSS, programming and Python.

9th Summer School on Artificial Intelligence | IIIT Hyderabad | 6-11 July 2025
Certificate of participation; learning focused on computer vision and machine learning.
